EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Heribert Muensterer on May 6, 2009.

The application has been amended as follows:

IN THE CLAIMS:

Claims 22 and 31 have been canceled without prejudice.

Claim 21 has been replaced to read as "A cosmetic or dermatological wipe, wherein the wipe consist of a water-jet consolidated and water-jet impressed nonwoven material which is moistened with a cosmetic or dermatological impregnation liquid which comprises at least one of oil, a silicone oil and a lipophilic substance and has a water content of less than 0.5% by weight, based on a total weight of the impregnation liquid, a viscosity of less than 2,000 mPa·s and wherein the wipe exhibits a uniform sequence of elevations and indentations in the nonwoven material."

Claim 39, line 1, after the phrase "consists of" insert- - a water-jet consolidated and- - -.

Claim 39, line 3, after the term "mPa's" insert - - - - and comprises at least one of oil, a silicone oil and a lipophilic substance and has a water content of less than 0.5% by weight, based on a total weight of the impregnation liquid- - - -

Claim 40, line 4, after the term "mPa's" insert - - - - and comprises at least one of oil, a silicone oil and a lipophilic substance and has a water content of less than 0.5% by weight, based on a total weight of the impregnation liquid- - - -

Remarks

The above amendment places this case in condition for allowance.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious the claimed A cosmetic or dermatological wipe, wherein the wipe consist of a water-jet consolidated and water-jet impressed nonwoven material which is moistened with a cosmetic or dermatological impregnation liquid which comprises at least one of oil, a silicone oil and a lipophilic substance and has a water content of less than 0.5% by weight, based on a total weight of the impregnation liquid, a viscosity of less than 2,000 mPa's and wherein the wipe exhibits a uniform sequence of elevations and indentations in the nonwoven material.

The cited prior art Gott et al. teach cosmetic towelettes comprising a water insoluble substrate and a fluid cosmetic composition impregnated into the substrate, however, Gott's composition must contain at least about 80% by weight of water and there is no apparent reason for one of ordinary skill in the art to employ less than 0.5% by weight of water. Therefore, this reference teaches away therefrom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
